WAN AWARDS submission guidelines:

Online upload

Please upload one thumbnail, main image and supportive text (We advise around 200-250 words for your online entry). Tips below:

1- Please make sure to include the use of the building if not immediately obvious. Please use this space to summarise & outline your project attributes.

2- You have 1 main image upload for your online submission. Feel free to collage/combine images to show more of your project if you wish.

3- Please make sure your main image is no larger than 1200 pixels width x 2000 pixels height and no smaller than 622 pixels width x 412 pixels height. If your images are outside of these specifications you will not be able to upload online.

4- When uploading please remember to press the submit button. Once you have submitted your entry the team then check your entry backstage before publishing online. You will get an email notification when your entry has been published with a link to see your entry submission.

PDF Presentation

Please supply a **10 page, one sided, hi-res A3 PDF (this can be portrait or landscape)**
Presentation is important, judges are influenced by a clearly presented scheme that they understand. It's the first step to get them to connect with your project. Follow the tips below and you will greatly increase your chances of winning.

1- Show the site clearly in its surroundings and show orientation (north point). Judges always like to see how a project responds to its environment.

2- Clearly identify which element is being submitted, especially in phased projects and masterplans.

3- Include all floor plans at max size to make it easier to understand. The judges are working on A3, so multiple floor plans on one page make it hard for them to follow. Label and or list the different plans for easy orientation of the project.

4- There are no border restrictions on printing so feel free to design your ten pages with either a boarder or full bleed.

5- Your presentations will be printed so make sure the images or diagrams included are at a high resolution (300 dpi) so that they are not pixelated when printing.

6- Any more than ten pages will not be accepted as a submission. Please do not create a cover or index page as this will be put aside and uses up valuable presentation space.

7- Include large images of your project from all sides. The jury do not want to guess what the back or sides of the building look like because you have not incorporated any information.

8- Please incorporate text including the key challenges of the client brief and how your design addressed it – include bullet points and short sentences where possible. We advise around 500 words.
The presentations are NOT anonymous. Feel free to incorporate your firms name and logo where appropriate.

The deadline for both the online upload and 10 page A3 pdf is **30/06/17 5pm (GMT)**

You are allowed to submit an unlimited number of entries in one or multiple categories. One entry fee = one project submission.
